TEDS21 Phase 1 Parent Questionnaire: Raw Data Coding

This document shows response value coding for all items in the raw data from the TEDS21 phase 1 parent questionnaire. The layout and ordering of the questions is based on the paper booklet version. However, the formatting has been modified in order to accommodate value codes; for example, font sizes and table layouts have been changed, and page numbering has been removed.

Raw data were collected in three ways: on paper, in the app (CMS) and via the web (backup).

The raw data from the paper questionnaire are stored in tables in the Access database and are exported as csv files for dataset construction.

The original raw data files from the app and web servers have now been cleaned and aggregated together into a single csv file for dataset construction. As part of the cleaning process, item variable coding was changed where necessary so that the coding now matches that used in the paper data.

The raw item data coding is shown in this blue font, and this coding is identical in all versions (paper, app, web).

This red font is used to show the corresponding value coding in the dataset. Another document shows the dataset variable names in addition to value codes for every item, but for reasons of space the variable names are not duplicated here.

In the electronic (app and web) versions, the ordering of sections of questions differed and the wording of introductions was sometimes different. However, the wording of actual questions and responses was the same as in the paper version.

Many measures are tabulated and have a consistent response value coding for all items, and in these cases the coding is shown in the table heading and not for every single item. If the coding differs for different items within the same table, then the code values are shown for each item within the body of the table.

In the backup version, nearly all items in this parent questionnaire had an explicitly coded "prefer not to answer" response option, generally coded 0. This has been recoded to missing in the raw data (and hence in the dataset) for compatibility with the other versions.

In the CMS version, most items were optional and a "prefer not to answer" button was displayed; however, selection of this option in the CMS resulted in a missing value and not in a coded value. In the paper version, respondents could choose not to answer any given question so there was no need for a "prefer not to answer" option.

What best describes the living arrangement of you and your twins?

Recorded in the dataset into two variables (one for each twin) as 1=yes, 0=no

- Both twins have a permanent residence with me 1
- Only the elder twin has a permanent residence with me 2
- Only the younger twin has a permanent residence with me 3
- Neither twin lives permanently at home 4

If either twin no longer lives permanently at home, when did s/he move out?

Children of your twins

TEDS is launching a new study called Children of TEDS (CoTEDS). The aim is to collect data on the development of the TEDS twins' children. In order to invite TEDS twins to join CoTEDS, we are gathering information about which of them have children. If either of your twins have or are expecting children, and if you think that they might be interested in joining CoTEDS, please answer the questions below.

The data in this section were collected for admin purposes rather than for analysis. After collection, the data were transferred into an admin system and were followed up by further contacts with the twins.

The data from this section have not been retained in the raw data, with the exception of two items that are non-identifying and which are potentially useful for analysis - these items are indicated below.

The CMS and backup versions originally included screening questions, used for branching purposes. As indicated below, these screening questions were either dropped or they have been restructured so that the variables take the same form as in the paper version.

1. Do either of your twins have children?

	Yes 1	No 0
	1	0
Elder twin	<input type="checkbox"/>	<input type="checkbox"/>
Younger twin	<input type="checkbox"/>	<input type="checkbox"/>

In the CMS and backup versions, the initial screening question was: "Do either of your twins have children (excluding pregnancies)?"

The response options were

- No, neither or my twins have children
- My elder twin has children, but my younger twin does not
- My younger twin has children, but my elder twin does not
- Both my twins have children
- Prefer not to say

Responses were restructured into yes/no variables as shown above, and as used in the paper version.

In the CMS and backup versions, if there were positive responses to the questions above, two further screening questions were presented:

"How many children does your elder twin have?" and

"How many children does your younger twin have?"

Responses to these questions determined the numbers of child records requested in question 2 below.

2. If yes, and if you are prepared to give details, please tell us about the children below. Details from this question have been used for admin purposes but are not retained in the raw data.

(a) Elder twin's children:

Child's full name	Child's birth date (dd/mm/yyyy)	Child's gender (M or F)
Child 1		
Child 2		
Child 3		

(b) Younger twin's children:

Child's full name	Child's birth date (dd/mm/yyyy)	Child's gender (M or F)
Child 1		
Child 2		
Child 3		

3. Are either of your twins currently expecting a baby? If yes, and you are prepared to give details, please also tell us the approximate expected due date.

In the CMS and backup, the questions below included a "prefer not to say" response option - now recoded to missing.

	Yes 1	No 0	Expected due date (dd/mm/yyyy)
Elder twin	<input type="checkbox"/>	<input type="checkbox"/>	
Younger twin	<input type="checkbox"/>	<input type="checkbox"/>	
	1	0	

The "expected due date", where given, was used for admin purposes but has not been retained in the raw data.

4. If there is anything that you think we should know before inviting either of your twins to join CoTEDS, please let us know in the space below.
