Introduction to test

Just a couple of things before we start, are you in a room on your own? (YES/NO) Is it possible for you to be on your own? Great, can I also check you can hear me OK?

You are going to hear some sentences that are questions. Sometimes they will sound right, but sometimes they won't sound quite right. I want you to tell me if they sound 'right' or 'not quite right'. (confirm understanding).

Let's try an example.

1p: What is this? (audio)

Does that sound 'right' or 'not quite right?'

Participant responds **right**: *That's correct!*

Participant responds **not quite right**: *That sounds right to me. I would say 'what is this?'*

Let's try another example

3p. What is he do?	Right <u>Not Quite Right</u>	NQR – correct! R –That doesn't sound quite right to me
4p. Where the forks are?	Right <u>Not Quite Right</u>
